Advance Raven

Digital Situational Awareness Solutions
advanceraven.com

Introducing Advance Raven, fueled by Fail Safe Technologies, Your communities' digital disaster reporter toolbox, where augmented reality meets situational awareness. Fail Safe Tech provides geospatial situational awareness solutions leveraging accessible digital reporting channels to streamline the response and recovery phases associated with public safety activities via the Advance Raven platform.

With Advance Raven, you can deploy an easy to use, mobile friendly, always ready digital resource to add to your emergency response arsenal in a matter of minutes; that is also cost effective!

Advance Raven bridges the gap by facilitating collaborative information sharing through private-public partnerships that strengthen coordination efforts ultimately promoting the continuity of operations and reinforcing resiliency within a community.

At Fail Safe Tech, we realize the lack of real-time interoperable emergency technical resources is frustrating. Advance Raven streamlines strategic information and resources sharing concerning situational awareness.

Elevate community awareness; rapidly identify problem areas for electric and telecommunication providers for improved response and restoration times; you local 511 on road hazards, closures and incidents; the possibilities with Advance Raven are endless!

For proven interoperability, scalability and easy to use web based emergency support tools, professionals choose Advance Raven, fueled by Fail Safe Technologies LLC for digital situational awareness solutions.
